TRAILERLESS MOWING

FILLING A VOID

IN THE INDUSTRY!

We're excited to announce that at First Response Land we have been working on creating our new setup! This will be a different style setup than the standard Truck and Trailer that most are used to seeing around and will allow better access to a variety of types of properties.

Welcome to Trailerless Mowing

Many of you may have reached out to Lawn Care Businesses and ended up being told "We Cannot Get Our Mower In Your Yard!" We are here to Combat that issue. While work is not fully complete on the new setup, we will be on the Road this coming week as we continue finalizing the setup with a DoveTail Ramp System, Equipment Mounts and Fully Letttering the Truck to Ensure Visibility on the Roads!

What we are doing to fill this Void in the Industry is retrofitting a Ford Ranger with a Ramp System to allow smaller equipment to be kept in the Truck Bed. This cuts down on the Access Issues, Curb Space Needed for Parking as well as Wear and Tear, and also makes the setup easier to drive, multi functioned to perform various tasks and allows multiple Maintenance Crews to function at the same time.

At the current moment, we will be outfitting this truck with our Smaller Push Mowers to begin Maintaining our Smaller Properties! This system will have our equipment that can fit through smaller gates and get onto tighter properties!

If you have a property that other companies cannot get access into due to Equipment Sizes, give us a call and we would be happy to get you a quote!

Benefits of Trailerless:

- Easier to Drive
- Less Curb Space Needed
- Ability to Get to Tighter Areas
- Ability to Carry Different Equipment
- Ability to have Multiple Trucks on Site for Large Jobs

COMING SOON!
